**I'm Going to Take Astronomy & Design & Business & History...**

Course registration opens soon! Your class schedule can make or break your semester. Read this newsletter for tips on how to plan a schedule that is just right for you!

---

**Class Registration**

**WHEN CAN I REGISTER FOR CLASSES?**

Freshmen will be able to register for Fall courses from June 10 to June 14.

To find your exact registration date, click [HERE](#).

**REGISTRATION CART**

Registration cart is an optional and highly recommended feature on MyMAP to help you plan your schedule. You can submit your preferred classes to be automatically added to your schedule or your waitlist (if classes are full). You must submit your cart by 5:59 pm one day before your registration date. To learn more, click [HERE](#).

---

**College Credits**

**HOW MANY CREDITS SHOULD I TAKE PER SEMESTER?**

Taking the right amount of credits is really important. The amount of credits that you take per semester will determine how long you’re in class every day, as well as how many hours you’ll spend outside of that class on homework. It will also determine just how fast or slow you graduate.

Here are some general guidelines for gauging how many credits you should take this semester:

- **18** Credit Maximum
- **15** 4-Year Graduation
- **14** Scholarship Eligible
- **12** Full-Time Student On-Campus
- **9** Housing

**MAJOR ACADEMIC PLANS**

Something that can also help you plan your classes correctly are the “Major Academic Plans” (MAPs). If you have declared a major or minor, or are interested in investigating a bit more into a specific major, a MAP will give you the general academic map for that major. To find your MAP, click [HERE](#).

---

**Planning It Out**

**HOW & WHERE DO I PLAN MY CLASSES OUT?**

1) See BYU’s Class Schedule [HERE](#) to search by course, credit hours, and day & time.

2) Use MyMap’s “Plan Courses” tab to help you plan out your schedule.

3) Use the Waitlist Option (You will be automatically added to the class if a seat becomes available).

**HERE’S SOME TIPS TO LAY OUT YOUR SCHEDULE:**

- **Block your classes together.**
  This will open up your life a bit more for other activities, like work and clubs. If you plan to work on campus, most shifts are 8:00 AM to Noon or 1:00 PM to 5:00 PM.

- **Early Bird or Night Owl?**
  8:00 AM can feel pretty early after a few weeks of going to bed late.

- **The 10-Minute Break**
  Most classes end ten minutes before the hour, giving you ten minutes to get from one class to another. You can have classes back-to-back; ten minutes is enough time to get across campus.

- **Balance your schedule.**
  It’s probably not a good idea to take Calculus, Physics, and Chemistry all in the same semester.
